**AMENDMENT TO THE CLAIMS**

**Please amend the claims as follows.**

1-7 (Canceled)

8 (Currently Amended): A transparent surface protective film for transparent conductive substrates protecting a surface opposite to a side of a conductive thin film of the transparent conductive substrates or a surface on a side of the conductive thin film, comprising:

a transparent base material film,

a transparent adhesive layer formed on one side of the base material film, and

a transparent antistatic layer formed on the other side of the base material film,

said transparent surface protective film being configured to maintain transparency even after one-hour heat treatment at 150°C,

wherein the antistatic layer comprises polymers having ~~pyrrolidium~~ pyrrolidinium rings in main chains thereof.
